

IT SOLUTIONS THAT SIMPLY WORK

Afinety provides complete IT services for small and medium-sized businesses. Our unique “Standardized” approach is designed to increase your efficiency and decrease your bottom-line costs. Whether you’d like to completely outsource, or increase the potential of your in-house IT, Afinety offers affordable solutions that simply work.

Why Afinety?

Known Working Standards: Afinety is the only integrator for the SMB market that tests and certifies commercial software into a set of **Known Working Standards**. Our Network Operations Center in Pittsburgh, PA continuously updates our network standards as new products and versions are released. By creating these precise standards, we are able to provide our clients with a fully tested and standardized network that simply works, all day every day. No other integrator can approach this level of reliability and standardization.

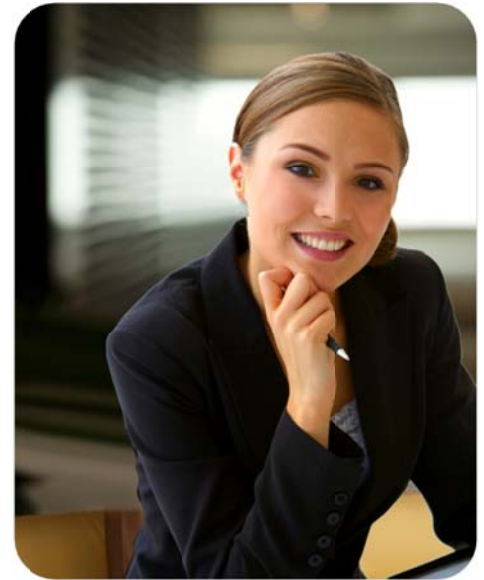

Your Applications Run Better when they are on a solid network core. Afinety networks allow any application to run faster, smoother and more trouble-free than you have ever experienced.

Hundreds of Clients and Thousands of Users put our standards to the test each and every day. When you get your computer system from Afinety, you can be sure its been battle tested and is ready for work when you are.

Spend Less for More. Firms often spend far more to keep an old system alive than it costs to upgrade AND maintain an Afinety Standardized Network. Most clients report between 37% and 40% overall cost savings compared to their previous IT budget and, at the same time, dramatic performance improvements for their users.

A “Trouble-Free” Network That Costs Less

The Afinety Network Health Assessment (NHA) is your first step to finally getting the computer network you deserve. We will analyze your network and business requirements then deliver a highly detailed and customized plan to get your firm on track towards a quality IT solution. **Contact us today and schedule your complimentary NHA.**

WHAT OUR CLIENTS SAY

Gibbs Giden Locher & Turner LLP extends its gratitude and appreciation to Afinety and its staff for another smooth systems integration at the firm. This is the third full systems integration Afinety's staff has completed, each more difficult and complex than the previous one. A majority of Afinety's staff has worked on all three conversions - a testament to Afinety's dedication to a project and its commitment to quality. Job well done!
